FILL THE FORESTER: COMING TOGETHER FOR PETS IN NEED

At Best Friends Fur Ever, community isn't just something we talk about—it's something we live every day. This October, we were honored to join forces with Jones Bel Air Subaru and the Humane Society of Harford County for Subaru Loves Pets Month and the annual Fill the Forester campaign. Together, we rallied our incredible pet parent community to collect donations and raise awareness for local pets in need, and the response was nothing short of amazing.

Throughout the month, our BFFE families came together with one shared goal: to make a difference for the animals who need it most. Thanks to their generosity, we filled over five Subaru Foresters with food, toys, treats, bedding, and essential supplies for the Humane Society of Harford County. Each donation represents a small act of love that will help a shelter pet feel a little warmer, a little safer, and a lot more cared for.

This initiative wasn't just about donations—it was about connection. Every bag of food and every squeaky toy carried a message of compassion from one animal lover to another. It reminded us that when we work together, we can truly create a ripple of kindness that reaches beyond our own walls and into the hearts of pets and families across Harford County.

We're so thankful to our partners at Jones Bel Air Subaru for inviting us to be part of this meaningful effort. Their commitment to Subaru's "Loves Pets" mission shines through in everything they do, from community drives to adoption support, and we're proud to stand beside them in making a difference.

To our incredible BFFE pet parents: thank you. Your generosity, your spirit, and your love for animals are what make partnerships like this so powerful. Together, we're building a community where every pet has the chance to feel loved, safe, and home.

COMING SOON: ACC+ BY BEST FRIENDS FUR EVER

When your dog comes home after surgery or receives a chronic illness diagnosis, recovery can be the hardest part. That's where ACC+ comes in.

ACC+ provides structured, medically informed care for dogs who are cleared by their veterinarian but not yet ready to return to full activity. It's a calm, supportive environment designed for healing — guided by your dog's care plan and coordinated directly with your veterinarian.

We support dogs recovering from orthopedic, neurological, dental, or surgeries, as well as those managing chronic conditions like arthritis, diabetes, or cancer.

Our team focuses on:

- Gentle daycare and boarding for rest and safety
- Accurate medication management
- Supervised recovery and limited activity
- Consistent communication with your dog's veterinarian

ACC+ bridges the gap between clinic and home – giving dogs the structure they need to recover comfortably and giving pet parents peace of mind.

SEASONAL TREATS MADE WITH LOVE

PAWS & APPLAUSE: STEPHANIE

This month, we're celebrating one of our shining stars: Stephanie, our "Play My Way" handler at Best Friends Fur Ever Cockeysville and the latest recipient of our Paws & Applause award!

Stephanie was recognized for always going above and beyond for the dogs in her care. She treats every pup like her own — and trust us, you should see her camera roll! Her genuine love for the dogs shines through in everything she does, from her patience and positivity in the play yard to the heartfelt updates she shares in daily report cards.

If you're one of our Cockeysville pet parents, there's a good chance you already know her voice from those cheerful report card check-ins.

Behind the scenes, Stephanie also lent her creative touch to our marketing team, helping bring the Sherlock Bones Halloween Special to life with 98 Rock and Josh Spiegel.

Stephanie's dedication, warmth, and creativity make her such a special part of our team. We're so grateful for the energy she brings every day — and for the love she shares with every dog who walks through our doors.

Join us in giving her a big round of paws and applause!

BFFE FUN FACT: PAWPRINTS IN THE FROST

As temperatures drop, dogs can sense the change long before we bundle up! Their paw pads contain specialized receptors that help them navigate chilly surfaces and maintain balance on frosty ground. So when your pup prances through those early-morning leaves or light frost, they're not just exploring—they're built for it.
